EDUCATION

Cambridge Institute of Technology

Artificial Intelligence and Machine Learning

CGPA: 9.56

Bengaluru, Karnataka

Sept 2023 - June 2027

PROFILE SUMMARY

Results-driven and detail-oriented Artificial Intelligence and Machine Learning Engineering graduate seeking an entry-level position to kickstart a career in software development or IT solutions. Possess a strong foundation in computer science principles, programming, and emerging technologies.

PROJECTS

Women's Security App

Tools: Python, Machine Learning, NLP, Flask, AWS

Developed an AI-powered safety platform providing real-time alerts, emergency assistance, location tracking, and area safety reviews for women.

Air Quality Prediction and Monitoring System

Tools: Python, LSTM, ARIMA, TensorFlow, Pandas, AWS

Built a predictive analytics system to forecast air quality using multiple environmental parameters and time-series machine learning models.

Disaster Response and Resource Allocation System

Tools: Java, Spring Boot, MongoDB, REST APIs, AWS

Developed a platform that helps authorities track disasters, manage relief resources, and coordinate emergency response efforts in real time.

WORK HISTORY

ISRO Sponsored Research Project Intern | Sep 2025 – Present

Working on AI/ML-driven research and data analytics solutions for scientific applications, contributing to software development and model implementation.

Software Engineering Intern – Goldman Sachs | 8 Weeks

- Built a runtime-configurable Distributor Management System using MongoDB-backed JSON storage, versioned update APIs, in-memory caching, and cross-service cache synchronization.
- Developed an admin console for distributor CRUD operations with mock fallback support, live data refresh, and conversational onboarding workflows powered by Copilot agent skills.
- Designed PDF template transformation and validation tools to automate domain mapping, schema evolution, drift detection, and cross-validation of production inventories, reducing template breakage risks.

Tech Stack: Java 8, Spring Boot, JAX-RS, Jackson, MongoDB, React, TypeScript, Vite, JUnit, Apache PDFBox, Batch Scripting

Cybersecurity Intern – HIPLA Technologies | Nov 2023 – Dec 2023

Gained hands-on experience in cybersecurity, network security, vulnerability assessment, and security best practices through practical industry projects.

SKILLS

Programming Languages: Java, Python, JavaScript, SQL

Development & DevOps: Spring Boot, React.js, REST APIs, AWS, Docker, Kubernetes, GitHub Actions, CI/CD Pipelines, Git, GitHub, GitLab, Linux

Databases: MySQL, MongoDB

AI & Machine Learning: Natural Language Processing (NLP), Deep Learning, Computer Vision, Transformers, CNNs, RNNs/LSTMs, Large Language Models (LLMs), Scikit-learn, TensorFlow, PyTorch

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS)

Soft Skill: Leadership, Community Building, Analytical Problem Solving, Public Speaking, Technical Communication, Initiative & Ownership

CERTIFICATION

- DevOps Foundations – LinkedIn Learning
- Programming in Java – NPTEL (IIT Kharagpur)
- Introduction to Large Language Models (LLMs) – NPTEL
